

Pharmacy costs are rising and will continue to represent an increasing percentage of the costs associated with the daily operation of a Skilled Nursing Facility.

Today, Veritas has emerged as a key budgetary and operational solution for the Skilled Nursing Facility marketplace.

It's helping to fulfill an overwhelming need by facilities for an independent expert to help them "NAVIGATE" through their pharmacy billing information and make sense of what is best for the facility, treat the patients safely and to help lower pharmacy costs.

Today, these strategies define the integrity of a drug benefit program and empower facilities to be better-informed decision-makers about the need, appropriateness and cost of their drug resource use.

Call TODAY and receive a **FREE** 1-month retrospective pharmacy billing audit.

NEED SOME DIRECTION?

Pharmacy Costs, Pharmacy Contracting, Utilization Management

Pharmacy Cost-Containment and Administrative Consulting
