VERITAS

UPDATE: Since the last HPSI newsletter, March 06', VERITAS has received numerous responses and has contracted with many new SNF clients. The average savings per 100 bed SNF is \$1,800 / month or 14%.

VERITAS provides services to assist SNF's in the assessment and performance measures of their pharmacy provider, assuring that the pharmacy is accurately administered and costs to the SNF are minimized. VERITAS can also identify the hidden costs within the SNF's pharmacy program!

VERITAS assesses each client's individualized needs and serves ONLY as an advocate for each SNF client. And the fact that Veritas maintains independence from the institutional pharmacy industry makes it a perfect adjunct to any SNF operation.

VERITAS is in this unique position, because of its tremendous wealth of experience and expertise of pharmacy-specific issues that the LTCF client would overlook.

Respond to this newsletter TODAY and receive a FREE month's audit for one (1) designated facility.
